

Date: July 11<sup>th</sup>, 2023

Topic: DNC Observations

Observations:

1. My vendor account received an alert/email per hour. Please review and fix this.

2. Something happened when this product was created, there is an error. I just created one variation; more than one product appeared in the website and when I click on the CLICK HERE link on the Stock Quantity column, the variation and product image do not appear.

3. Please make sure that the map appears when the website is opened. I try to find the map with the CTRL key and mouse cursor and nothing appears.

4. I noticed that the system doesn't let the vendor select a package type per carrier; it only allows to select one package overall. Please review and fix this.

5. Why does creating a new variation form and updating a variation form are different? Please make sure that

these are the same form.
